DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-34 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-27 of prior U.S. Patent No. 6,770,716. This is a double patenting rejection.

The chemical formulation and a method for producing a polymerized product in the present claims are within the scope of the vinylaromatic/diene graft copolymer made by the method in claims 1-27 of Patent 6,770,716. The metallic salt having a long chain carboxylic acid in claims 4, 14 and 22 of patent 6,770,716 are readable in the present claims. The long chain carboxylic acid metal salt in the claims 1-27 of patent 6,770,716 is the same metal carboxylate compound in the present claims. The same compound has the same effect to control or regulate size diene polymer particles for the present claims 2, 3, 12, 13, 19 and 28. The same recovered polymerized product such as high impact polystyrene (HIPS) is readable in claim 28 of Patent 6,770,716.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

4. Claims 1-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Sosa et al U.s. Patent 6,770,716.

The applied reference has a common inventors name with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

There is no applicants' reference with Form 1449.
